SUMMARY

Backend engineer with 3.5 years of experience building REST APIs and data-driven services in Python. Comfortable with Flask, FastAPI, PostgreSQL and Docker, with growing exposure to AWS. Looking to move into larger-scale distributed systems.

EXPERIENCE

Software Engineer — Cartwheel Technologies, Bengaluru
Jul 2022 – Present

- Built and maintained 12 REST APIs in Flask and FastAPI serving ~1.5M requests/day for an e-commerce order management platform.
- Reduced average API latency by 35% by tuning PostgreSQL queries, adding indexes and introducing Redis caching.
- Containerised services with Docker and deployed them to AWS EC2 and RDS; wrote basic GitHub Actions workflows for automated testing.
- Wrote unit and integration tests with pytest, raising coverage from 48% to 82%.
- Integrated third-party payment and shipping providers via webhooks and background workers (Celery + RabbitMQ).

Junior Python Developer (Intern → Full-time) — DataLeaf Solutions, Pune
Jan 2022 – Jun 2022

- Developed internal dashboards and ETL scripts using Python, pandas and SQL.
- Automated weekly reporting, saving the analytics team roughly 6 hours per week.

PROJECTS

- **Resume Analyzer** – Flask + React app that scores resumes against job descriptions using the Gemini API.
- **URL Shortener** – FastAPI service with Redis-backed rate limiting and PostgreSQL analytics, deployed with Docker Compose.

SKILLS

Languages: Python, SQL, JavaScript (basic), Bash
Frameworks: Flask, FastAPI, Celery, React (basic)
Data & Infra: PostgreSQL, Redis, RabbitMQ, Docker, AWS (EC2, RDS, S3), GitHub Actions, Git
Testing: pytest, Postman

EDUCATION

B.Tech, Computer Science and Engineering — Pune Institute of Technology, 2018 – 2022 (CGPA 8.2/10)
